

Support Ticket Path Logic — Routine, Billing, High-Risk

1. Routine Support Ticket Path

Condition:

- Issue_Category ≠ Billing
- Customer_Risk = Low or Medium
- Sentiment ≠ Negative
- Requires_Human_Approval = No

Actions:

- Update ticket with final resolution
- Send routine support email
- Create audit log entry

2. Billing Escalation Path

Condition:

- Issue_Category = Billing

Actions:

- Update ticket with billing escalation resolution
- Send billing escalation email
- Create audit log entry

3. High-Risk / Cancellation / Negative Sentiment Path

Condition:

- Customer_Risk = High
- OR Issue_Category = Cancellation
- OR Sentiment = Negative

Actions:

Human Approval Step

- Request approval
- Reviewer sets: Approved / Rejected

- Reviewer adds notes

If Approved:

- Update ticket
- Send approved email
- Create audit log entry

If Rejected:

- Update ticket
- Do NOT send email
- Create audit log entry
- Assign to Manual Review
